

Founder's Day To Be Celebrated By Unique Ceremony

Sentries Will Parade in Front of James McGill's Tomb

CLASSES END EARLY

Fall Convocation For Confering Degrees To Follow Military Display

Founder's Day will be celebrated this year with a unique ceremony, according to present plans. In the past there has been an absence of display on this historic occasion, but this year a fitting commemoration has been arranged scheduled for October 6, which will be of interest to all McGill students, and in particular to those who are now entering McGill for the first time.

Colonel the Hon. James McGill, founder of the University was born in Glasgow in 1744. He came to Montreal where he became a successful merchant, a member of the North-west Fur Company and the Beaver Club. He was interested in education and when he died in 1813 he left his dwelling known as "Burnside" situated at the corner of the streets now known as McGill College Avenue and Burnside Place, together with forty-six acres of land and a sum of \$10,000 to the Royal Institution for the Advancement of Learning to Found a University of which one of the colleges should be called McGill College. Owing to persistent opposition McGill University was not officially opened till 1829.

Sentries to Parade

James McGill was the first Colonel of the first battalion of the Montreal Militia. The Canadian Grenadier Guards are proud of their descent from this battalion. Henceforth it will be an annual event on Founder's Day for a guard to parade in full dress to McGill Grounds. Two mounted sentries will patrol a beat in front of the Arts Building, by McGill's tomb, where since June 23, 1875, the remains of our founder have lain. The sentries will be changed every fifteen minutes for an hour.

A guard of twenty-five men and officers will attend the ceremony and the band of the Canadian Grenadier Guards will play throughout. Lectures will cease early to enable as many as possible to attend. After the ceremony the fall convocation for confering of degrees will be held, at which the principal, Sir Arthur Currie will give an address. This is the first occasion on which Founder's Day has been celebrated with military pomp, though it is thought only fitting that the memory of our great benefactor should be honoured in some way. It is therefore anticipated that students will take a greater interest in the day than they have in the past.

List of Lecturers Includes Dr. Kiang

Extra Mural Department Names Speakers

A comprehensive list of lectures at McGill has been announced by the department of extra-mural relations. There will be 19 offered by Dr. Kiang Kiang-Hu, professor of Chinese studies and director of the new Chinese department. He will speak on Chinese religions, literature, art, politics, and personalities.

Dr. C. Leonard Huskins, professor of genetics, will have several interesting topics. Lieut.-Col. Neil Bruce MacLean, professor of applied mathematics will range the whole way from the solar system to the battlefields of France. N. W. Norton, of the department of English, is to dwell on fish-erfolk in Labrador and Quebec. George A. Nelson, demonstrator in architecture, will give three illustrated lectures. Charles B. Rittenhouse, assistant in English, will talk on Negro spirituals and allied subjects.

Other lecturers will be Frank Pentland Chambers, assistant professor in architecture. Ronald Darnley Gibbs, lecturer in botany, Gordon B. Glasco executive secretary of the university, and George Hunter, lecturer in accountancy. Prof. E. R. Adair, Dr. W. H. Barnes, Col. Wilfrid Bovey, Dr. J. W. Bridges, Dr. H. D. Brunt, Dr. William Caldwell, Dr. A. S. Eve, Dr. D. A. Keys, Dr. L. M. Lindsay, Dr. T. W. L. MacDermot, Dr. J. A. Nutter, Mr. Justice E. Fabre Surveyor and Dr. N. D. Woodhead.

Faculty Head

PROFESSOR ERNEST BROWN who succeeds the late Dr. H. M. Mackay as Dean of the Faculty of Engineering.

Lord Bessborough Presents Diplomas

French Summer School Ends Successful Season

SPEAK FRENCH ONLY

Classes Held During July In New Extension Of R.V.C.

His Excellency, Lord Bessborough, Governor-General of Canada, presented the prizes and diplomas to graduates of the McGill Summer School in French at the end of its session in July. The ceremonies were held in the Royal Victoria College.

The tenth season of the Summer School was organized under the directorship of Professor Du Roure for a period of five weeks.

The classes were held in the Royal Victoria College and the new extension was used for the first time. This Summer School has proved most popular since its reopening after the war in 1922. It is not for elementary students, but for those who have some knowledge of French grammar, those who have had some practice in speaking French, and those who speak the language fluently. For the entire duration of the session all the students attending find themselves in a purely French atmosphere and hear and talk and read nothing but French.

Many From Outside

Some two hundred pupils have been attending each year, but the great majority of these come from Ontario, the United States and the Eastern Townships, and the smallest proportion from Montreal and district.

For a month, the pupils, who come from all over Canada and United States and even from far off Hawaii, talked and read nothing but French. They were at table with a French master who led the conversation in French. They went only to French "talkies."

On the platform with His Excellency were Sir Arthur Currie, Col. Wilfrid Bovey, Edouard Carleton, consul-general for France in Canada; Sir John Childs, aide to Lord Bessborough, and Professor Du Roure.

In all 170 prizes and diplomas were awarded. The only English used during the convocation ceremony was when the gathering sang God Save (Continued on Page Four)

Discuss Proposal To Aid Workless

Consider Building Convention Hall

Several problems are being studied by McGill and the city authorities in relation to the proposal to erect a music and convention hall over the McTavish reservoir situated between Pine Avenue and the University grounds. The suggestion has been made that this building should be constructed out of unemployment relief funds, and Sir Arthur Currie, principal of the University, with Col. Wilfrid Bovey, director of extra-mural relations, have interviewed Ald. W. S. Weldon on the subject. There is a fear that the covering in of the reservoir would injuriously affect the water, which is now purified by the sun's rays, while there is a question as to whether it would be desirable to make this section of the city a convention and concert centre.

Nothing definite has been decided as yet by the city as to the site for a convention hall, although the need for such a building has been urged for many years, and it is felt that the present would be a good opportunity to put such a project into operation.

Doctor Stresses Need of Medical Aid to Indigents

Public Health Must Be Safeguarded During Depression

CHILDREN IMPORTANT

Tuberculosis is Grave Danger Of Under-Nourished Poor of Today

That medical services should be available to all was the keynote of the talk of Dr. Grant Fleming, professor of Public Health and Preventative Medicine and Director of that department at McGill, at the luncheon of the Lion's Club yesterday.

Dr. Fleming is also the medical director of the Financial Federation of this city. His subject was "Safeguarding public health during the present."

Relief of the poor was first started in the time of Queen Elizabeth, stated the speaker, when Parliament passed the Poor Laws, which are partly in force in the present day. They enacted that every man had a right to food and lodging. Medical service should be available to all.

At the present time methods are different. In Quebec the government has found it satisfactory to subsidize private organizations such as the Federated Charities. In ordinary circumstances this method is sufficient. But when faced with the unemployment and its accompanying distresses it is time for the government to take a direct hand in relief.

Not Pure Relief

Neither is it a matter of pure relief Dr. Fleming continued. There must be health services as well. There must be supervision of the diet of families taking relief. Rickets and kindred diseases are recognized to be due to malnutrition especially before birth. Prevention is more important than correction and all poor families' diets should be properly supervised. The whole health is dependant on the diet.

One of the most prevalent diseases of poverty is tuberculosis. Fortunately, tremendous strides have been made in the prevention of that disease which is one of poverty. The children of those in relief lists are in ill-health and are open to attack. Dr. Fleming mentioned that there was some talk of cutting the relief grants. In conclusion he made an appeal to the Lion's Club and other such bodies saying that "if at this time of hardship and ill-health, there is insufficient feeding of the poor, there will be a marked increase in tuberculosis and other grave maladies."

Will Make Drastic Changes In Rooting

Five Cheerleaders Will Help At Football Games

The new cheerleaders, in an interview last night, made several declarations regarding their plans for the year. "Cheerleading at McGill has been greatly neglected during the last few years. The rooters have for the most part been non-existent as far as their services have been concerned." This year, the leaders say, will find a great revival in rooting which will make a vital change in our football games.

Reorganization is being done under the direction of Charlie Sturdee. There are to be five assistant cheerleaders under him. There will be diverting stunts at half time, which recently has proved so boring. Rooters' parades are to be held before all games. Freshman practices are to be held until that section of the student body is proficient in all the McGill yell.

Bobby Bell Helps

One of the most salient factors of the new campaign will be Bobby Bell, the honorary hockey coach, who is to superintend the rooters' practices. Night bonfires are suggested as a time for these practices.

The Band, which has increased its numbers, will play an important part as it is under its direction that these changes are being made. Those in charge of cheerleading are taking a strong hold on their duties this year and intend to make the student sections provide the heretofore missing feature of our games. They point out that the cheers of the rooters are just as much a part of the game as the efforts of the players themselves.

Students Placed In Summer Posts By Employment Bureau

GOLD prospecting, digging ditches, radio announcing, painting houses, selling magazines, acting as life-guards, sports directors, and tutors, driving taxis, and waiting on tables were among the more interesting of a large number of varied jobs performed by McGill students during the summer months.

Miss Heasley of the Bureau of Appointments announced that despite the decrease of 200 calls for employment over the previous summer, a large number were able to obtain jobs. Already this term some 75 students have applied for jobs and despite the present economic conditions, she feels sure that many will obtain jobs this year as well.

Many tales have been reported by students concerning their summer work; especially by magazine salesmen who were thrown bodily from homes by irate husbands.

Dean Discusses Views On Music

Douglas Clarke Attended Meeting In England

NEW MUSIC HEARD

Oxford Professor and Ellen Ballon Coming To Montreal Shortly

In an interview yesterday Douglas F. Clarke, Dean of the Conservatorium of Music, who has recently returned from a visit to England for the meeting of the International Society of Music gave an outline of the work done. To this convocation at Oxford and London came all the best known musicians of the world.

Featured during the meeting of the Society, said the Dean, were examples of the most modern music, compositions mainly of Wallock, Gershwin and Wabner, radically different from traditional music and some of them strange and bizarre, but some with a new spirit and a new technique in musical composition. In the Dean's opinion, the best work played to the Society was written by the English composer William, in his ballet, "Job." The work of this composer in both orchestral and string quartet composition is considered to excel that of his contemporaries in other countries.

The Three Choirs in Gloucester was rather disappointing, said Professor Clarke, but he added that the re-orchestration of Handel's "Overture in D Minor" impressed him as being exceptionally well done.

Notables Present

While the Society was meeting in London it heard some of the work of Constant Lambert, conductor of the Rio Grande orchestra. His "Pomona" ballet shows great ability. The Dean remarked on the fact that at one of the meetings of the Society he noticed Kaye Don, the famous speed boat racer, who left soon after for the Harmsworth Trophy race in the United States.

Among other notable men present was Sir Hugh Allen, Professor of Music at Oxford and a personal friend of Clarke's, who is expected to appear soon in Montreal. The music critic of the Morning Post, who also attended the meeting of the Society, will come to Montreal for a month at a date not far in the future.

Coming to Montreal

Among noted musicians coming to Montreal is Ellen Ballon, a former Conservatorium student, who has gained a reputation in the United States and Europe. Her most notable performance will be the interpretation of the concerto of Grieg in A Minor. The Hungarian Composer, Harry say is coming from Toronto and (Continued on Page Three)

DAILY REPORTERS

There are a few vacancies left on the staff of the Daily for any men or women interested in reporting news or sporting events. Reporters are needed for Sunday and Friday evenings in particular. The News Editor will be in the Daily office in the basement of the Union between one o'clock and two-thirty this afternoon to interview applicants. Former members of the Daily staff are reminded that re-registration is necessary in order to continue with the paper.

Former Dean Of Medicine Retires From University

Dr. Brikett Resigns After Years Of Service

MR. BURRELL LEAVES

Was Comptroller At McGill For Forty-three Years

In the retirement of Dr. Herbert Stanley Brikett from McGill as announced after the meeting of the governors in August, McGill loses a man who gave all his life to his alma mater.

Dr. Brikett rose to be dean of the faculty of medicine, he was an author in his own right of 12 books on throat diseases and worked in connection with his post as head of the Otolaryngology Department.

Graduating in 1886, Dr. Brikett later offered a position on the staff at McGill and became a junior demonstrator. He was one of the highest awards his colleagues could give him, and now he closes the last chapter of his active life, and "finis" is written to his book of academic activities, after almost half a century of noteworthy endeavour.

Dr. Brikett

But though McGill will know him no more as an active professor, so able a man is not long to be lost to the community. With so many medical and hospital affiliations it is likely the service and advice and influence of the learned professor many years yet to come.

Graduated In 1886

Dr. Brikett ceased to be dean several years ago, but he still remains a factor in medical Montreal for onstrator. He was made a professor of laryngology in 1895, and then in 1906, his title was created into professor of otolaryngology. Then came the elevation to dean of the faculty of medicine. He retained his professorship in his own beloved subject to which he had given a lifetime of endeavor—otolaryngology—right up till today.

Honoured Frequently Many honours from time to time have come to Dr. Brikett. He was chief of the Department of Otolaryngology, at the Royal Victoria Hospital he is consulting otolaryngologist for the Alexandria Hospital he holds the same post in the Mackay Institute for Deaf Mutes, (Continued on Page Four)

Novel Engineering Feature Described

Quebec City Connected To Harbour By Tunnel

Describing the tunnel recently built to connect Quebec city with the new harbour extension, Lieut.-Col. Hillman, constructing engineer for the Canadian Pacific Railway, lectured to the opening meeting of the Engineering Institute of Canada last night.

Since the Quebec harbour has been extended towards the west due to the lack of space as well as the hindering west winds along the St. Lawrence River, stated Col. Hillman, a new route was naturally sought from Quebec city. The tunnel was constructed for this purpose and runs beneath the Plains of Abraham meeting the new harbour extension one and one-half miles out of Quebec. Work on this tunnel began a year ago last August and has just been completed this July. Colonel Hillman explained the use of special concrete in this construction, illustrating with slides different parts of the tunnel as the work progressed.

The lecture was followed by open discussion in which many of the members took part. The meeting was then adjourned, and refreshments were served.

Freshettes To Be Feted

Freshettes will be afforded an opportunity of meeting their classmates and Seniors at a tea which will be served in the S.O.A. Room in Strathcona Hall today from three to five p.m. New women students who have not been taken care of by Seniors are invited to drop in this afternoon and meet their classmates informally. These teas are free of charge.

Commanding Officer

MAJOR BUCHANAN, who succeeds Major Jenkins M.M. as O.C. of McGill unit.

Recruiting Brisk In McGill C.O.T.C.

Maj. Buchanan Commanding Officer Has Active Career

NEW ROOMS OPENED

Annual Corps Smoker To Be Held In Union Next Wednesday

Optimism would seem to be the key-note of the recruiting campaign inaugurated yesterday by the McGill C.O.T.C. under the direction of the new officer commanding, Major Buchanan. The corps has secured new quarters for the quartermaster's stores which it is believed will be much more convenient than the rooms used in the past.

Major Buchanan who succeeds Major Jenkins as O.C. has been intimately connected with the officer training corps activities both in England and Canada and brings to the task a variety of experience both as an infantry and cavalry officer. Major Buchanan served overseas with the 13th Royal Highlanders of Canada and was with the Highlanders at the capture of Hill 70 in August 1917 where he was wounded.

After recovery, in July 1918 Major Buchanan was appointed Brigade Bomb Officer and served as such for several months, rejoining his old unit in time to take part in the fighting of the last few months of the war. In 1919 Major Buchanan returned to Montreal where he was born, and after his admittance to the study for the bar, graduated from McGill in Law 1921.

Since graduation from McGill Major Buchanan has passed the military staff course. In 1929 he was transferred to the 17th Duke of York Royal Canadian Hussars with whom he has been attached until his recent appointment to the C.O.T.C.

Yesterday when recruiting started many old faces and quite a few new ones were seen at the orderly rooms. These recruits will be welcomed at the annual smoker of the corps to be held in the Union cafeteria next Wednesday. At this event former members of the corps will be present and a varied programme is being drawn up, which however is being kept a secret until the night of the event.

Many New Members At Band Practice

Players of Brass and Wind Instruments Wanted

The University Band, held its first practice yesterday afternoon in the Union Ball-Room and because of the large turnout many new members attending the boys were able to go through several brisk numbers.

As the attendance was well over thirty and all the departments are pretty well filled Bandmaster Shaw expressed the opinion that the prospects were the brightest in years. He pointed out however that new members will be welcomed especially those who play Alto and Baritone instruments.

A large amount of music has been bought and orchestrations prepared. Since the assistance of Mr. Harry Norris of the Conservatoire has been obtained those joining are assured of receiving excellent musical instruction.

Bandmaster Shaw urges all brass and wind instrument musicians to turn out for the next practice which is to be held in the Union Ball-Room next Tuesday at five o'clock.

Canada Welcomes English Students For Schools Here

Greater Number To Take Up Studies At McGill

CITIZENS SUPPLIED

Intended To Strengthen Bonds Of Friendship With Britain

Resulting in the visit of a party of British schoolmasters in the spring of 1930, and the formation last summer of the Anglo-Canadian Education Committee, thirty-three English students are entering Canadian Universities this fall. Of these nineteen are coming to McGill.

Eight of those coming here are entering Commerce, six into applied science, three into agriculture at MacDonald, and two into arts and science. There are also three going to Toronto, eight to Queen's and one each to the University of British Columbia and the agricultural college at Guelph.

The reason for bringing these men out to Canada is to give useful citizens to this country who will strengthen the ties with the Old Country. Also by mixing boys of different educational and social backgrounds, the lives of both English and Canadian boys may be enriched.

Two Committees

At the head of the movement are two committees, one English, composed of prominent men of that country, and the other, Canadian. The Canadian committee is composed of E. W. Beatty, K.C., chairman, Sir Arthur W. Currie G.C.M.G., Sir Joseph Flavelle, W. Hamilton Fyfe, M.A., LL.D., Hon. W. D. Herridge K.C., Hon. R. Lemieux K.C., J. M. McDougall, Brig.-Gen. Victor Odium, C.B., C.M.G., D.S.O., G.F. Pearson, K.C., and R. C. Wallace, M.A., Ph.D., LL.D. The honorary treasurer is Ross Clarkson and the honorary secretary, Brooke Clayton.

Scholarship Winners

There are also three students selected for Canadian scholarships. These three men are, P. M. Beatts, Taunton School, holder of the W. M. Birks Scholarship at McGill, E. H. Gilmour, Allevy's School, Dulwich, awarded a Senior Award by the London County Council tenable at Queen's University Kingston, in Arts, and R. C. J. Goode, St. John's College, Cambridge, awarded a Rhodes Trust grant for Post-graduate work in mining engineering at McGill. The majority of these students are boys leaving school at the ages of seventeen to nineteen years.

Well known English schools are represented by this group who are coming to Canada, among them being Winchester, Oundle, Clifton, Westminster, Charterhouse, Shrewsbury and others.

Exchange Opens With Heavy Sale

Last Year's Record Broken Yesterday By \$150

Record-breaking sales featured the first day of the Book Exchange which opened yesterday in the basement of the Union. The Committee reported sales amounting to \$380, or \$150 better than last year's opening day. The Exchange is under the chairmanship of R. A. Hamilton, and F. D. Cleland, R. M. Hamilton and S. T. Willis form the committee.

Books will be received up to the middle of next week, and the Exchange will remain open for sales until October 15th, it will then close until next February, when it will re-open with a stock of second-term books. The Exchange is open from 2.00 to 5.30 every afternoon, excepting Saturday.

Following is a list of books in special demand. Rapid sale is assured by the committee.

Introduction to Organic Chemistry (Clark); German Grammar (Van der Smitten); Marchen und Erzahlen (Guerber); Heat, Light and Sound (Duncan and Starling); Introduction to Sociology (Dawson and Getys); History of Western Europe (Robinson); First Greek Book (White); Laboratory Manual in Chemistry (Evans, Hatcher, Steacie); Kimball's Physics; Newell's Chemistry; Principles of Political Economy (Gide).

Paste It In Your Hat

Elsewhere on this page is printed the Athletic Board Account for the year ending May 31, 1931. It should be of especial interest to those who remember the argument over the seating arrangements at the games, which raged last session when better accommodation for student ticket-holders was requested.

For the past several years the Athletic Board has shown a staggering deficit. The session of 1930-31 has been no exception. The revenue amounted to \$19,765.23 as against an expenditure of \$24,846.92, leaving an excess expenditure of \$5,081.64 to be made up by the University.

Certainly no "commercialism of sport" charge can be laid against this institution. Football, the big money attraction at American colleges shows a loss at McGill of almost six and one half thousand dollars. All the other athletic activities show a deficit with the sole exception of hockey. The winter sport, with a profit of \$2,830.64, is the only bright spot on the whole list. This good showing is probably due to the success of the team last year in reaching the Eastern Allen Cup playdowns, with the resulting heavy schedule and added revenue due to the large number of games played. A poor team this or any other year would reduce this figure considerably, in fact, the hockey club showed a loss in 1929-30 of about three thousand dollars, despite the fact that the team won the inter-collegiate title.

In the face of a deficit amounting to over one-quarter of the revenue it is obvious that the Athletic Board can not provide better accommodation for students if in doing so they must increase their already heavy budget, that is, unless they increase the present ten dollar levy on students by at least \$2.50 to cover their present loss. The allotments to the basketball, B. W. and F., track and other non-profit-making clubs which at present absorb each year a sum equal to over half of the amount raised from the student levy can not, without reason, be reduced drastically. Public opinion demands that the football team, like the navy, be kept up to strength regardless of expense. Beyond these there are few departments in which expenses can possibly be reduced without a proportionate loss of efficiency.

These being the facts, it is scarcely reasonable to expect the Athletic Board to go to further expense without making some attempt to raise the student subscription from ten to, say, fifteen dollars. We can foresee the fate that any motion as unpleasant as this would receive at the hands of the Students' Society.

What To Do?

After experiencing the exhilarating effect of discovering the Arts Building, and finding that he does not have to pay for his copies of the Daily, the freshman usually sits down and tries to make up his mind as to what he is going to do at college besides studying. A difficult task indeed he has before him. There are very few to help him choose his extra-curricular activities, and unfamiliar with the various organizations as he is he can not very well help himself. The little red book which he is given when he registers gives him an insight into the numerous clubs and societies, but some of these have listed nothing but the names of their executives.

Recalling the mental tortures we suffered in our freshman days leads us to try to record the major activities of several of the many campus organizations.

The Debating Union, the Player's Club, the Red and White Revue, the Daily, and the Choral and Operatic Society are among the larger and better known of voluntary student activities. These need no introduction to the first year man for he will naturally gravitate towards the Player's Club or the Red and White Revue if his bent be dramatic, towards the Debating Union if it be oratorical, towards the Daily if it be journalistic. But there are other places where the new student may profitably apply his time and effort.

If he is inclined towards things military the C.O.T.C. will find him soon enough. But there are many clubs which simply sit and wait for the members to appear. And there is no reason why the freshman's timidity should keep him from attending meetings. Among these are the Cercle Francais, for students who want to try to improve their French, and its female counterpart the Societe Francaise, the Band for those who play portable musical instruments, the Labour Club for men interested in labour problems and their solutions, the League of Nations club for those interested in international affairs and many others. And then there is the Chess club.

Don't be afraid, freshman, to put your

best foot well forward and attend the first meeting or the first tryout or the first interview. No one but yourself knows that you are a freshman, that is not unless you tell them.

Clear Your Throats

For the first time in several years a serious attempt will be made this session to organize the McGill rooters into an effective body. No less than five cheer-leaders have been appointed and have already started to work.

The McGill repertoire has in the past been confined to that one old favorite, "What's the matter with..." given spasmodically throughout the game. The lack of enthusiasm of our rooters has contrasted very poorly with the polished work of the Varsity rooters who have learned the secret of making the welkin resound.

The first intercollegiate football game will not take place until October 17, and before that date the cheerleaders hope to perform some good missionary work. So, as Bobby Bell has said, "Let us be the Thundering Thousands, not the Feeble Fifty."

Staff Changes

The Managing Board of the McGill Daily is pleased to announce the appointment of Sam Schwarzbard, formerly of the sports reporting staff, to the position of associate editor in the sports department. The resignations are also announced of M. M. Aspler, associate editor in sports, Ted Levine, also associate editor in sports, who has gone to the University of Montreal and Gabe Slotin, also associate editor in sports who is prevented from returning to college this year due to illness.

COLLEGE CAPERS

Or How Students Behave at a Survey School

Macdonald College and a whole month of May are individually fine enough, and in spending the one at the other, the students who go out there to learn surveying are not simply satisfied in discovering some topographical data about a farm, but must also make their temporary residence there felt for the rest of the summer—at least.

And so the newest batch of engineers to be initiated into the mysteries of surveying created at the same time a new series of reminiscences.

There is, unfortunately, no annual log book of behaviour kept, except that in the minds of the professors who are connected with them, and so it

is hard to contrast the students with their predecessors.

One such criterion may be their caution money. Rumour had it that little of the \$10 deposited ever found its way back. This year a good deal more than half was returned, which would suggest that the students had behaved, — but any one of them can tell you better. The architects, a small group of seven, received an even greater amount than the engineers, but to all intents and purposes, they conducted themselves in a more constrained manner than the majority. — All minorities do so it seems!

ENG. '34 in ten or fifteen foot letters, painted in whitewash on the lawn of Macdonald College, before the main building is the semi-permanent mark left by the students. It was laid out by means of strings in some obscure corner and between dark and 3 a.m. of one night was placed on the lawn and painted ready for the world when it awoke. Other more permanent relics were left in the village scratched upon freshly set concrete, or impressed upon certain inhabitants of St. Annes.

And there were the usual "Boarding School" pranks, laughable in five cent magazines, but far-fetched in actuality. All first year students slept in a gymnasium on camp cots, and these latter being admirably suited to the type of mentality that indulges in the sport, caused merriment to the populace when upon simple adjustment the bed collapsed upon occupation.

Unpleasant bedfellows were an oft experienced result of this playfulness. These varied from a June bug to an egg, all of them causing unmentionable discomfort to the sleeper so as to draw forth such strong language as could on good authority rival that at a military camp.

One thing undertaken by the students that had no precedent was the presentation of a "Little Revue" written, directed and acted by themselves. Its audience, the college community, claimed it to be a success, and this was due entirely to its spontaneity.

The Revue lasted one hour and consisted of twelve skits. Most of these were musical, while the rest concerned topics of interest at Macdonald's. Three days in all was spent in rehearsal, and to this was ascribed the success of the venture. As intended the audience was kept in a gay humour which even the difficulties and language of the piano-mover could not affect.

Engineers are surprisingly musical and are performers of no mean standing. Half of the McGill band was out at the Survey School and in addition to a number in the Revue, it held a "practice" occasionally for the benefit of the students. A very excellent pianist, and fine performers on the violin, banjo, guitar and uke, and even accordion were also to be found.

The student's forty minute walk to and from their survey four times daily may have dampened some of their ardor insofar as work was concerned, but they had all their faculties at their finger tips after 6.30. This Year's freshmen may make more damage when they go out to St. Annes next May, but they cannot enjoy themselves more.

WILL STUDY ABROAD

H. M. Estall

Berlin and Paris will be the respective homes of two of McGill's graduates for the next six months. H. M. Estall, and G. S. Chailles, who both won scholarships last May, are to continue studies in European universities.

Martyn Estall is the winner of a Moyse Travelling Scholarship in literary subjects. He sailed for Germany on the fourth of September and is now studying in Berlin.

George Swan Chailles has won the Guy Drummond Graduate Fellowship in Economics and Political Science. He will sail on the ninth of this month for Paris, where he will study six months. Following his stay abroad he will work on his M.A. thesis.

Fall Presentation Will Be Announced

Players Club To Hold First Meeting Next Week

The play which is to be presented this fall by the McGill Players' Club will be announced to the members of the club in a general meeting which will be held next week. Casting for the play will be immediately undertaken.

At the present time two or three plays are being considered by the club executive who will reach a final decision before the meeting.

The time for the play has been decided, the dates being November 20-21-22, giving six weeks before the first night for preparation.

The director for the play has not yet been decided upon but it is expected that this important position will have been filled before the meeting.

Benefactor Dies

R. R. Blacker Donated Works To McGill Library

Robert R. Blacker, noted for his many donations to the library of McGill, died at his home in Pasadena, California, this summer.

From among his many donations to the university was the Blacker Library of Zoology, which is the largest collection of works on vertebrate zoology in any university on this continent.

Owing to illness, Mr. Blacker was unable to attend the last convocation of the university, where the degree of LL.D. (honoris causa), was to have been conferred upon him.

CANADIAN OFFICERS TRAINING CORPS
MCGILL UNIVERSITY CONTINGENT

HONORARY COLONEL—

GENERAL SIR A. W. CURRIE,

G.O.M.G., K.C.B., R.O.

COMMANDING OFFICER—

MAJOR E. B. Q. BUCHANAN, (m.s.c.)

The attention of new students at the University is called to the maintenance here of a Contingent of the Canadian Officers Training Corps, the first one organized in Canada, which prepares candidates for certificates "A" and "B", granted to those successful in the Examinations set annually by the War Office. These certificates qualify candidates for the rank of Lieutenant and Captain.

It is not essential that those joining the Contingent should take examinations for certificates "A" and "B".

Shaughnessy Calls For Light Drill Under Floodlights

McLennan Bolsters Line—Major Forbes Lends Helping Hand

CADETS DUE TODAY

Training Table Innovation To Be Introduced On Saturday Morning

THE 1931 edition of the Redmen is showing every promise of being a strong contender for the intercollegiate title. On Monday night in their exhibition skirmish with Westward, although the football was of the early season variety, the team looked like potential champions, and the return of Shaughnessy in a coaching role has greatly enhanced their possibilities.

Yesterday's workout was of the light variety. Major Forbes appeared in the approved rugby garb, and inspired plenty of pep in the line work. Gus McLennan, the 210 pound science tackle was out again, and he should add plenty of punch to the front rank, where he will probably team up with Reg. Wilson and the other huskies.

Farquharson Shows Promise
Just how far the team will go in their quest for the Intercollegiate title would seem to rest upon the solemn shoulders of Hugh Farquharson, left winger deluxe of the Quebec hockey champions. Shaughnessy's eagle eye singled Hughes out, punting the ball around; he immediately installed him behind the line of scrimmage as the possible solution of the kicking duties, and "Farky" has been booting them handsomely.

Saturday's game with R.M.C. will be the first opportunity for many of the students to see this year's squad in action. A year ago the cadets humbled the big red aggregation, but Shaughnessy's "Hopefuls" declare that this year it will be a vastly different story. However, win, lose, or draw, the haughty cadets can be counted on to furnish real opposition and should give McGill its first acid test of the season.

The soldiers will arrive in town tonight, and will pitch their camp at the McGill Field House. Tomorrow they will be followed by a large number of their loyal and colorful supporters; they of the "Pill box" hats and the crimson tunics. An innovation Saturday morning will be the holding of a joint training table for the members of both teams, at which the order of the day will probably be plenty of raw, red beef steak; and then at 2:15 the fireworks will begin.

Dean Discusses Views on Music

(Continued from Page One)
Harriet Cohen, the best interpreter of Bach's music, perhaps better known in Europe than in this country, will also give a recital in the city.
As regards the Glee Club, the Dean said that he hoped to make a permanent engagement for them at His Majesty's Theatre, but could give no further details.

SPORT NOTICES

RUGBY PLAYERS.

Eligibility forms have to be filled in today by all wishing to partake in either the Junior, Intermediate or senior games on Saturday October 10th. Anyone who has not done so already or who is not sure if he has done so should get in touch with the manager and have it certified. The penalty for late eligibility forms is five dollars, which has to be paid by the player himself as the Athletic Board is not responsible for carelessness in this regard. The following have not registered yet or have filled in the forms illegibly or incorrectly. They must see the manager today, or else they cannot play on October 10th: McLennan, Law, Dangerfield, MacBrien, Brenhouse, Hilliard, Wood, Cliff, Cameron, McGillivray, Doherty.

ENGLISH RUGBY

The English Rugby season opens for McGill this Saturday when the Red and White are at home to M.A.A.A. on the lower campus at three o'clock. The following men have been selected to play, and must be physically examined today: Wootton, Chalmers, Rice, Skinner, Butterfield, Grimes-Graeme brothers, Hart Hanbury, Montgomery, Laurie. There will also be a practice for these men on the lower campus this afternoon at 4:30 o'clock.

R. V. C. TENNIS TOURNEY.

Co-ed tennis enthusiasts are asked to sign the lists posted in R. V. C.

Rugby Tickets

Tickets for the R.M.C. game on Saturday are now on sale at the Union ticket office. Student coupon number 2 will admit students to the game. In the rooters' section, it will also be honoured as 30 cents on the purchase of a reserved seat. Books of student coupons are obtainable when a receipt for athletic dues is presented.

Queen's To Play M. A. A. Saturday

Intercollegiate Champions Are Fairly Well Intact

McTEER WITH ARGOS

WHILE Don Young and company are busy with R. M. C. on Saturday afternoon the M. A. A. Intercollegiate football team, which showed to such good advantage under the Molson Stadium lights on Wednesday night, will be entertaining the great Queen's University squad on the St. Catherine Street gridiron. The intercollegiate champions seem to be fairly well intact and are expected to give M. A. A. a great battle for an exhibition game. "Gib" McKelvey has been moved from flying wing to the pivot position, and is captain of the team. Carter will again do the kicking, and advance reports state that he is just as good as ever. De Diana, and Stewart are two more of the Tricolour who are well known to McGill fans, and who will be in action Saturday.

Just how the collegians have taken to the forward pass is not yet known, and so their battle with M. A. A. will be of interest to McGill fans. Certainly the latter team has given the "best" forward passing exhibition to date, and if the Tricolour can hold the Interprovincials it will be an indication that they still have the class to make them feared contenders for the intercollegiate title once more.

McTeer With Argos.

Another recent item of football news interesting to McGill is that George McTeer is to turn out with the Toronto Argos. It was rumored here for a while that McTeer might return here, and be seen in the red and white sweater once more; that he wore so well. Certainly he will have many friends here who will wish him luck with his new teammates.

and in the Arts Building Common Room. Entries close today at five o'clock. The draw will be announced in Saturday's Daily, and the tournament will begin on Monday. In past years these tournaments have tended to be unduly prolonged. This year, it is hoped that the finals will be played off by the end of next week.

Tennis Tournaments

The entry lists for the tennis tournaments close at five o'clock this afternoon. They are posted at the McTavish Street courts. Entry lists for the R.V.C. tournament are in the Arts Building Common Room.

Splendid Array Of Track And Field Stars At Stadium

Phil Edwards, Famous Olympic Runner, Leads Newcomers

MEETS ARRANGED

Relay Race Will Be Staged For Saturday's Football Fans

AS the frosts brought an end to last year's track and field season, it appeared that after winning the championship, one of the strongest and best-balanced of McGill's squads was about to break up completely. The team was made up largely of 1931 graduates, a group of which had helped to win two championships in their four years, and which seemed to be leaving the university much weakened in their particular line of sport by their departure.

But as spring rolled round things looked slightly better. A large proportion of the graduating men declared their intention of returning for advanced studies, and rumors began to float round of track stars entering McGill in the fall. The 15th of September—the traditional day for the first track practice—arrived, and beginning then a track squad which far surpasses last year's, and anything in recent years, put in its appearance in groups of two or three new men each day till now the squad not only has an array of stars, but is also fairly well balanced, as was not the case at first.

Three Meets Planned

The first appearance of the new squad as a whole will be in the annual Interfaculty meet next Friday. The Freshman-Sophomore meet has been cancelled this year for various reasons. Shied among these is the fact that almost no Arts, Commerce or Engineering freshmen, the ones that the meet is supposed to serve, have entered yet. Following the Interfaculty, the schedule reaches a climax with the Intercollegiate meet in Montreal on October 16th, while the Intermediate meet is also being held here the week following.

As well as in the three big meets, the track men will be seen in action in at least three relay races throughout the fall. At the R.M.C. game Saturday McGill will race M.A.A.A. in a mile relay, with another return race being run at an M.A.A.A. game later on. Then as one of the events in the big athletic day on October 17th, the red quarter-milers will meet those of Varsity and Queen's in the Intercollegiate championship.

Edward Leads Newcomers

A large number of the new men are middle distance runners, and in this class is the greatest of them all, Phil Edwards, a participant in the 1928 Olympic and the British Empire Games, and for a while considered the fastest half-mile in competition. He completed a brilliant career at New York University recently and is now in first year Medicine at McGill. Exactly what the British Guiana runner will compete in is undecided as yet, as

Water Polo Squad To Practice Today

Few Players of Championship Team Remain

CANDIDATES NEEDED

CAPTAIN Charlie Wayland and Coach Harold Fisk will meet the candidates for the water-polo teams this afternoon at the Knights of Columbus Natatorium on Mountain Street. The City League schedule is due to start in about three weeks, and two teams must be drilled into shape by that time.

Great changes have been made in the dates for polo this year. The intercollegiate games, instead of being held over to the spring to be run with the swimming meet, are due to follow immediately after the city league schedule, the home and home series being set for early November. Few players return from last year's senior squad, only Wayland, Payton, Bourne, Stein and French of the nine players. The junior team of last year's city league season is expected to fill these gaps, so that the second team itself will almost entirely be depleted. New candidates are urged to turn out for places on this team, with a possible chance of making the grade in senior company.

TRACK & FIELD NOTES

Track practices resemble inter-university conferences this year, with Cambridge, New York University, Loyola, Amherst, Dartmouth and Southern California all represented by their graduates.

The U.S.C. contribution is Olker, who has turned out for Rugby, and will probably not be seen on the McGill team this year. He is a hurdler and sprinter of some reputation.

The contribution from the High Schools is small but strong. The greatest of local schools for track teams, the High School of Montreal, sends up two fine men in Jim Worral and Rowland Lamb.

The abundance of half-milers is perplexing in some ways. Someone claims they heard "Van" wish out loud that he had some preservative in which he could store the 880 men, in which case he would have enough for many years to come.

Harrier prospects are good also, with Goode and Jacob as possible additions to the team. Nobody has been running outside the stadium yet.

The shot put is another popular event, with Painter, McMartin, Sprenger, Maughan, Anderson and Moore all tossing the brass ball well over thirty feet.

A big factor in the success of McGill's track teams is the care taken of their muscles by trainer Ernie Cook. Ernie is on hand every afternoon with his liniment bottle and a store of track anecdotes covering the sport from its earliest years.

Several of the veterans will profit

he could probably win any of the Canadian Intercollegiate middle distance events.

McGill will want to know!

That since last term there has been opened in Montreal a new and different Restaurant which with its pleasing surroundings, quality food and good service, provides an ideal up-town meeting place for Students for Breakfasts, Luncheons and Dinners, Mézzanine Teas, Late Supper Parties.

After the party, Friday and Saturday—open all night for you!

... SHOULD INVEST IN SHEAFFER'S FOR LIFETIME WRITING SATISFACTION

LOOK FOR THE WHITE DOT

Initial cost of Sheaffer's White Dot Lifetime Pen may be more but its first cost is its last cost. Superior materials and workmanship make it the largest selling pen in its price class today. It is the only genuine Lifetime pen. If a street car runs over it and the pieces are returned, a new pen is sent free without question. Even in \$5.00 and \$3.00 classes, Sheaffer pens and pencils are guaranteed to give best performance.

Sheaffer's Lifetime Autograph Point with platinum tip and feather touch, costs three times more to make than ordinary pens; Sheaffer pencil precision in a movement of Waspalumin costs five times more than ordinary pencils; restful Balance design eliminates top heaviness of old-style pens. Invest in Sheaffer and start school with the finest writing equipment—Sheaffer's. A price range to suit everybody and a pride of ownership that is priceless.

Former Dean of Medicine Retires From University

(Continued from Page One)
and with the Montreal Foundling and Baby Hospital.
Other titles he holds are: Fellow of the American Laryngology Society, president in 1907; Fellow of the American Laryngological and Otolaryngological Association, president 1913; Fellow of American Otolaryngological Society, vice-president, 1920; Fellow of the Royal Society of Medicine, Laryngological Congress, Royal Society of Medicine, honorary president; Otolaryngological section, Royal Society of Medicine, vice-president; Member British Medical Association, vice-president, Laryngological section 1897 to 1906. Member Montreal Chirurgical Society, president, 1903; Member Canadian Medical Association; Honorary Member Italian Otolaryngological Society, Member International Otolaryngological Congress; Member of the Committee appointed by the American Medical Association to standardize teaching in otolaryngology.
S. R. Burrell Leaves
Among the men who have served

longest at McGill University is S. R. Burrell, who has retired as controller in the administration department of the University, after 43 years long and valued service at McGill. There are very few who have had as long continuous service with this seat of learning, and universal regret was expressed in the offices when it was learned that Mr. Burrell had retired.
Ernest Brown, who becomes the new head of the Department of Engineering at McGill has a long and favourable record, and is an acknowledged authority on engineering problems.

The new dean took his Master of Science degree at Victoria University, and his Master of Engineering degree at University of Liverpool.

In 1900 he was appointed assistant lecturer in engineering at University College, Liverpool, and three years later became lecturer in charge of applied mechanics. This post he held till 1905 when he came to McGill as assistant professor in applied mechanics. Mr. Brown was made associate professor in 1907, and became a full professor of applied mechanics and hydraulics in 1911. This post he holds today, as he will continue to lecture.
Professor Brown is also the author of several books, and was called into consultation when the Quebec bridge was being built. He is a member of the Engineering Institute of Canada, and the American Association of Testing Materials.

Noted Presbyterian Dies This Summer

Rev. J. Williamson Was Professor in College Here

One of the outstanding figures in the Presbyterian Church in Canada, Rev. John Williamson, M. A. (Oxon), died this summer at his residence, 4095 Cote des Neiges Road. He was in his 78th year. At the time of his death, he was professor of classics in the Presbyterian College, Montreal, a position which he had held for several years. Although never in charge of any church in the city, he earned a name as an eloquent preacher through his appearances in the pulpits of various churches.

Mr. Williamson was born in Sanquhar Dumfriesshire, in Scotland. He was educated at Glasgow University, receiving there his B. A. degree, after which he was ordained a minister of the Church of Scotland. In 1880 he came to Canada and joined the staff of Loyal's private school in Montreal. Five years later, he returned to England, going to Oxford University and remaining there for two years, at the end of which time he received his M.A. degree.

He then came to Canada for the second time, establishing himself again in Montreal, and opening a private school under the name of the "Crichton School." This he carried on with notable success until 1911, when he retired. In late years he was lecturer in classics and Hebrew at the Presbyterian College.

Lord Bessborough Presents Diplomas

(Continued from Page One)
the King. Previously, O Canada and La Marseillaise had been sung.
Addressees Students.

After a speech of welcome by Professor Du Roure, Lord Bessborough, before he made the presentations, spoke in French as follows:

"The spirit of work and intellectual development which has prompted you to come from all parts of Canada and United States to spend several weeks at McGill University so that you might command to a greater extent the French language should be favorably commented upon and is worthy of sincere congratulations.

"In reaching this decision, you had to sacrifice your summer holidays and undoubtedly considerable pocket money which you might have spent in a more frivolous way. However, your judgment does you honor. This proves that you have realized the numerous advantages offered by modern languages which will greatly contribute to your improvement in whatever profession you may select.

World is Smaller
"With the constant progress of communication and transportation, the world is becoming smaller and smaller each day, constantly increasing our dependence on one another. The only barrier between various nations of the world is the ignorance of each other's language. Several centuries elapsed before everyone has fully understood the lesson emanating from the Tower of Babel.

"The great ambition to be achieved in our century is the establishment of world peace on a permanent basis. Nothing offers greater encouragement to amiable relations than personal contact which may be obtained exclusively through individuals who may exchange ideas and opinions without the assistance of an interpreter.

Needed in Canada
"This necessity is more deeply felt in Canada than in any other part of the world, where French and English are spoken.

"Far be it from me to repeat statements made at Ashbury College where my speech received too much publicity, but I sincerely think that Canada's position as the leading country of the world will completely depend on the inseparable union of French and English speaking Canadians.

"You will not leave McGill University to return to your homes. I would enjoin you to speak well of this famous university and of Sir Arthur Currie, its principal.

"One cannot attend courses at McGill University without imbibing the moral and intellectual atmosphere or meet Sir Arthur Currie without fully realizing the worth and the strength of character of the university's principal."

World Crisis and Gospel Discussed At I.V.C.F. Meeting

Inter-Varsity Christian Fellowship Holds Annual Meeting

ATHEISM COMBATTED

Rev. John Nicol Says Bible Does Not Conflict With Science

The Third Annual Conference for the Eastern Division of the Inter-Varsity Christian Fellowship was held this year in Toronto. Besides much prayer and Bible study, there was a number of addresses given by prominent clergymen and laymen. The conference itself was held in the Prayer Room of the China Inland Mission, and the quietness which pervaded everything and also the hallowed associations of the place were a constant benediction. The delegates numbered sixty in all, coming from Winnipeg, Hamilton, London, Toronto, and Montreal.

The conference started on September 18th. That night the keynote addresses of the conference were given by Rev. Ralph E. Hooper, a former lecturer in the University of Toronto, and Canon Dyson Hague, Rector of the Church of the Epiphany. The conference was continued the next day and besides a special discussion there were four missionary addresses. These were given by Rev. T. Darlington, China Inland Mission; Rev. John S. Hall, Sudan Interior Mission; Mr. J. E. Mallis, Ceylon and India General Mission, and Rev. W. J. Anderson of the Inland South America Mission. The speakers brought out aspects of the mission work from the four corners of the globe.

Church Services Held
Sunday morning the delegates went as a body to the Church of the Epiphany. Here the rector, Rev. Dyson Hague gave a soul-stirring sermon on "Growing in the Fullness and Likeness of Jesus Christ." In the evening the delegates attended Knox Presbyterian Church where the Minister, Rev. John G. Inkster, spoke on "The Source of Power." During the afternoon at a "squash" held at the house of the secretary of the I.V.C.F., Rev. F. N. Palmer, a discussion was held the subject of which was, "Winning Students to Christ."

Besides this reports were submitted from McGill, Winnipeg and the Public Schools of London. The conference was also addressed at this time by Rev. L. F. Wilmut, Pilot Mount, Man. Monday, much business was transacted which pertained directly to the I.V.C.F. Rev. John Nicol, M.A., Principal of the Toronto Bible College, gave an inspiring address on "The Biblical Approach to the Physical World." In this he showed how the Bible did not conflict with science but that the great scientists of today were coming to look on the natural and super-natural world in the same way that the Bible has for the last three thousand years.

World Crisis Discussed
On Tuesday Rev. J. W. Anderson, formerly a successful business man in the U.S.A. spoke on the topic of "The Business Man and the Gospel." In this he related some of the adventures in faith that he had had for the cause of Christ. At the closing of the religious part of the program Rev. T. W. Isherwood, Professor of Systematic Theology, Wycliffe College, Toronto, spoke on the most timely subject of "The World Crisis and the Gospel." He pointed out that we should not fear because Christ is with us and we have faith in his purpose.

The Conference ended on Wednesday morning, when after a Bible study group and a business meeting, Mrs. Maude Howe of the Canadian Christian Crusade gave some account of the fight against atheism in the universities of Canada.

Law Dean Away

It was announced recently at McGill that Dean P. E. Corbett, of the Faculty of Law, has been granted a year's leave of absence from his duties at the University. Professor C. S. LeMesurier, professor of civil law,

NOTICES

Notices must be legibly written on one side of the paper only. They must be handed in to the Daily office before eight o'clock on the night previous to publication. For sale notices not accepted.

NEWMAN CLUB

The first regular monthly meeting and Mass of the Newman Club will be held on Sunday Morning, October 4th in the Lady Chapel of St. Patrick's Church 454 Dorchester St., West, at 9:30 o'clock. All Catholic students attending the University are cordially invited to attend.

MCGILL ANNUAL

There will be a meeting of the board of "Old McGill 1931" on Friday, October 2nd, at 8:00 p.m. in the McGill Union. (2)

LIGHT AEROPLANE CLUB

Any students who are at all interested in Aviation are recommended to join the Light Aeroplane Club. Application forms may be obtained from Bill Gentlemen in the Arts Bldg. (5)

TEA FOR FRESHIES

Women freshies are afforded an opportunity of meeting their classmates and seniors at a tea given today from 3 to 5 p.m. in the S.C.A. Room of Strathcona Hall. This is free of charge. (2)

NOTICE

As saxophonist and pianist I would like either to meet musicians who are willing to make up a band, or join an orchestra already formed. Marcel G. LaRiviere, 6 Weredale Park, Weredale House, Westmount. FR 9621. (5)

LIGHT AEROPLANE CLUB

Those students, both sexes, who are interested in Aviation may obtain information about the McGill Light Aeroplane Club by filling out a form to be had from Bill Gentlemen in the office of the Arts Bldg. (6)

MEDICAL EXAMINATIONS

Special examinations will be conducted at 3484 University Street commencing Monday next from 12:15 to 1:15 daily, for the benefit of those students who have not yet been medically examined. (6)

BAND NOTICE

Mr. Norris will be in the Union Ballroom at 5 P.M. to instruct beginners. Will the following please be present: Cockerton, Rudkin, Mercer, Legrow, Shaw (R.).

Any others who are interested will be welcome.

MEDICAL SOCIETY

The first regular meeting of the McGill Medical Society will be held in the Assembly Hall of the Medical Building at 8 o'clock on Monday, October 5th.

Program:

1. Election of Secretary from Third Year.
2. Address by Dr. H. M. Little. "Certain Landmarks in the Early History of Obstetrics."
3. Refreshments

D. W. MacKenzie, Ass't. Secretary. (5)

FOR SALE

1. Kimballs College Physics.
 1. Newells College Chemistry.
- See at table in Arts Hall, at 7:01 today. (2)

LOST

Lost, slide rule in brown leather case, name, O. R. Brummell. Please return to Daily Office. (6)

FOUND

A fountain pen at 3484 University St. (5)

CHORAL SOCIETY

There will be a meeting of the Executive of the Operatic and Choral Society in ROOM A in Strathcona

will administer the faculty during Dean Corbett's absence.

Dean Corbett is a graduate of McGill and Oxford. He was Rhodes Scholar for Quebec in 1914 and was assistant legal adviser to the International Labour Conference at Geneva, 1923-24.

Hall this evening at 8.00 P.M. sharp. There are several matters of importance to be discussed. A full attendance is requested.

McGill Confers Six Honorary Degrees At Fall Assembly

Premier Bennett Among Those Honoured By University

TWO CONVOCATIONS

Founder's Day, October 6th, And October 14th, Dates Chosen

Fifty-two ordinary and six honorary degrees will be conferred by the University this fall. Among the recipients of the latter will be Hon. R. B. Bennett, prime minister of Canada who receives an LL.D. Two convocations will be held—October 6th for ordinary and October 14th for honorary degrees.

Three degrees of Ph.D. will be granted, 10 of M.Sc., seven of M.A., one of M.D., C.M., seven of B.Sc., in engineering, 10 of B.A., five of B. Comm., two of B.S.A., one of B.C.L., one of B. Mus. One diploma will be granted in Physical Education, three in music and one certificate in the School for Graduate Nurses.

Honorary Degrees

Those receiving honorary degrees will be Hon. Richard Bedford Bennett P.C. (Can.), LL.B., K.C. (Hon) LL.D., M.P.; Francis William McLennan, mining engineer; Hon. Alexander Cameron Rutherford, B.A., B.C.L., K.C., LL.D.; William Arthur Carlyle B.A.Sc.; Major General Robert Patterson, M.D. and Dr. W. Harvey-Smith M.D.C.M.

It is a notable fact that this is the last convocation where the degree of B.Sc. will be granted in engineering, the degree of B.Eng. having been adopted.

Premier Bennett

The most prominent of those receiving honorary degrees is Premier Bennett who was born at Hopwell, New Brunswick on July 3, 1870. He was the eldest son of Henry J. and Henriette (Stiles) Bennett. The family is an old one of the United Empire Loyalist stock and has lived nine generations on Canadian soil. The Premier was educated in the public and high schools of the province and then went to Dalhousie University in Halifax.

Discuss Problems At I.S.S. Meeting

McGill Represented By Baker and Lewis

Rallying to the call of the International Student Service, an assembly of two hundred and fifteen delegates from thirty-four different countries met at Mount Holyoke College, in South Hadley, Massachusetts. This year's conference is the tenth annual one and drew seventy-four students from the United States, and eighteen from Canada, these eighteen representing fifteen Canadian Universities. The active program drawn up lasted from September the 1st to the 9th. Kenneth Bales and David Lewis represented McGill.

Ambitious Program

The daily program consisted of ironing out problems that suggested themselves to the members. Discussion centered about the general topic "The University and the Changing World." The general trend of this year's conference aimed at the re-adjustment of University life in the light of the present international trouble. Originally the conference met for the express purpose of relieving the starvation that was rife among European students. That was ten years ago. Once accomplished, the need of a conference that could meet yearly to discuss students' problems was felt necessary. From that time on annual meetings have been held and each year were held in a different place.

European Challenge

Of particular note among the topics under discussion was the accusation of the American student body at large by European students that they were regarding not taking their

Fountain Remains Inactive As Plans For Base Debated

Those who had hoped to see the much discussed peace fountain on the Campus in action this fall are again to be disappointed according to Colonel Wilfrid Bovey, Director of the Department of Extra-Mural Relations. Although the fountain itself is ready, plans for the foundation are still being discussed by the American committee and University authorities and until these are settled the fountain cannot be connected to the mains.

Since this fountain, presented by a group of prominent Americans was placed on the Campus, it has enjoyed various adventures. The chief of these was a six months' confinement behind a discreet grey box from which it only emerged late last Spring.

Notes Differences Between Colleges

McGill Impresses Dr. W. H. Watson Favourably

EQUIPMENT IS GOOD

Finds That Montreal Book Stores Are Insufficiently Stocked

"First impressions of McGill as compared to the older universities of Edinburgh and Cambridge show one that there are many important differences," said Dr. W. H. Watson, Ph.D. M.A., the new Assistant Professor of Physics, in an interview yesterday evening. Dr. Watson spent several years at Edinburgh and Cambridge taking his degrees and pursuing advanced studies.

"In the first place," said the Doctor, "there are no daily newspapers in the British universities such as you have over here. There is also, I think, a greater sense of free and easiness in social contacts at McGill. Another way in which McGill differs from most universities in Great Britain is that it is in the centre of a large city. Many of our colleges are in small towns and I think this is better for the colleges." It was pointed out that when McGill was first founded it was entirely outside of Montreal, and the Professor smilingly admitted that this was true, though it did not affect his conviction that small towns made studying easier.

Book Stores Poor

"But there is one fault I have to find, not in the university, but in the city of Montreal," continued Dr. Watson, "and that is, that the book stores are somewhat poorly equipped. I was forced to send away for one of the texts actually prescribed for work in science, a text-book that is very widely known and could be bought in any other city of Montreal's size. There are several other books that I was unable to buy in Montreal. Also, I have never found in the stores any book that I had not previously heard of or seen. At Edinburgh or Cambridge one was always finding good books on scientific subjects or otherwise that one had not seen before."

The Doctor admired the beauty of the campus of McGill and stated that few of the colleges in Great Britain possessed such an expanse of grass and trees. He said also that the laboratory equipment in the University compared favourably with any he had found elsewhere and commented on the endowments which must have made such equipment possible.

Canada Prosperous

Turning to wider aspects, Dr. Watson remarked that as he was saying good-bye to Professor Rutherford, the world famous English scientist who spent some years at McGill, before coming to this country Professor Rutherford had recalled with pleasure the years he had spent at the University. Dr. Watson also remarked that Canada seemed far more prosperous than England. If one could judge from the number of cars in the streets and the larger buildings of the downtown district. The world depression had apparently affected Canada less than many other countries.

Owing to the fact that there will be a whole holiday on the 16th and that the 12th is a Dominion holiday lectures will not be cancelled on Friday, October 9th for the University Sports.

Four Benefactors Commemorated In Inaugural Function

McGill, Dawson, MacDonald, And Osler Remembered In Ceremony

GUARDS TO PATROL

Annual Celebration Will Fete Founder's Day In Future Years

Founder's Day this year is to be the occasion of a ceremony that is practically unique. It will inaugurate the annual celebration of the names of the benefactors of McGill. Among those will be the names of four men in particular, the greatest in the history of the development of the University: Col. the Hon. James McGill, Sir William Macdonald, Sir William Dawson and Sir William Osler. Of these, while the first was the actual founder of the University the last three were responsible for its development and its appearance at the present time.

Fine Records

The record of what these benefactors have done for the University is surprisingly extensive. Sir William Dawson practically saved it when on the verge of extinction. Infused new life into the work and paved the way for the modern development. Sir William Osler brought to the Medical Faculty a reputation which gave it a world wide prestige. Sir William Macdonald gave thirteen million dollars to the University in the course of his lifetime, endowing chairs and scholarships creating facilities for expansion, building Macdonald College and the Student's Union, and giving Macdonald Park as a site for the Molson Stadium, making it possible for McGill to fulfill her destiny and become a famous university. Had it not been for these men the University might never have survived its earlier period.

James McGill

What the Hon. James McGill did for the College is well known. His bequest included 48 acres of land, ten thousand dollars and his own dwelling. It is doubtful, however, whether he realized that the original College would expand to its present proportions, though had he not had the foresight to understand that the growing city of Montreal would need a university, it is doubtful if such an institution would have been founded until a far later date.

Besides many other activities James McGill, was the first Colonel of the first Battalion of the Montreal Militia, from which the Grenadier Guards of Canada trace their descent. Two mounted sentries of the regiment, who will be changed every fifteen minutes for an hour, will parade in front of the Arts Building by our founder's tomb and a guard of 25 men and officers will be present. The band of the Grenadier Guards will play throughout.

In the past there has been no ceremony to mark the passing of Founder's Day, but this year it has been thought that a fitting commemoration should be established.

Catholics Asked To Attend Mass

T. H. Trihey, K.C., Will Address Members

All Catholic students at the University are invited to the Newman Club's Mass which will be held tomorrow morning at 9.30 o'clock in the Lady Chapel of St. Patrick's Church, 454 Dorchester St., West. Freshmen and newcomers to McGill are especially invited to be present.

Following Mass, a buffet breakfast will be served after which the first regular monthly meeting of the Newman Club will be held. As is the usual custom, the members will be addressed by a prominent Montreal layman. For the first meeting of the present term, the executive of the Club have been very fortunate to secure T. H. Trihey K.C., a graduate of McGill and a well-known member of the Montreal legal profession. Upon many occasions in the past Mr. Trihey has proved to be a very capable and entertaining speaker.

Due to the resignation of Frank McNally, vice-president of the club, an election will be held at this meeting to fill the vacancy. Announcements will also be made of informal to be held in the latter part of this month.

As at present no complete mailing lists are available, all Catholic students registered at McGill are requested to accept this invitation without further notice.

Board Decides To Discontinue Grant To Social Workers

AT the August meeting of the Board of Governors, Sir Arthur Currie recommended that the appropriation for the School for Social Workers should be discontinued and the recommendation was unanimously accepted. It was felt that in the present financial condition of the University, funds could no longer be diverted to this School, and that the University should concentrate its attention on its primary functions instead of dissipating its resources over a wide area. Although no more applications can be received this fall the tuition will be continued to permit students in their second year to complete the course and obtain their diploma. The Arts Survey Committee concurred in recommending this policy.

Hoarding Of Gold Must Be Stopped

Prof. Day Expresses Views On Crisis

EXPECTS REACTION

Likely That Sovereign Will Prove More Convenient Standard of Trade

In an interview on his recent return from a summer sojourn in England, Dr. J. P. Day, associate Professor of Economics, stated that in his estimation any further sacrifices on the part of Britain to bring about a return to the gold standard would hardly be worth while unless the other creditor nations of the world give some satisfactory guarantee. This guarantee would have to be made for the express purpose of curbing the hoarding of gold and also to make it assured that the gold standard would be worked in the way in which it was intended to be worked originally. Having spent the summer in Great Britain, Dr. Day was in constant touch with the events leading to the abandoning of the gold standard.

Electorate Bewildered

In the month of July, the MacMillan report on Finance and Industry was published. This was to the effect that the underlying financial facts were more favourable than had hitherto been supposed and that Great Britain's position as a creditor country remained immensely strong. In strong contrast to this within a month the country was said to be on the brink of ruin. With the coming of the election, most of the electorate is in a state of complete bewilderment over the events which have precipitated this present crisis.

Professor Day's personal opinion of the events that happened recently is that the Bank of England, appreciating the adverse trade balance raised the bank rate from 3 1/2% to 4 1/2%. This is considered to be the Bank of England's most potent defensive weapon. On this occasion, the weapon proved to be useless and ineffective. Seeing their most potent weapon blunted, the Bank probably warned the Government of the true situation. The sterling could be supported for some time, but that time was not very long. A host of commissions were put to work and it was decided that the steps necessary for balancing the budget were to be taken immediately, and that something would have to be done to restore a favourable balance of trade. The result of this was a thorough scare for most people. The Stock Exchange closed to avoid panic selling. After all the attempts made to prevent it, the gold standard had to be abandoned. A reaction is bound to set in, and the sovereign will be stabilised. It is necessary to have faith and confidence in the stability of the sterling.

Gold Unsatisfactory

Professor Day concluded that since the monetary standard was unsatisfactory to Great Britain, it

(Continued on Page Two)

No Lectures October 16

All lectures will be cancelled on Friday, October 16. The annual Staff versus Students Golf Match will be played in the morning and the Intercollegiate Track meet will take place in the afternoon.

October 12 being a Dominion holiday, there will be no lectures on this day either.

Ramsay MacDonald Opens Convention At London Institute

Prof. W. T. Waugh One Of Four Canadian Delegates

INTERESTING PAPERS

Historians May Hold Next Quinquennial Conference In America

An interesting description of the Anglo-American Historical Convention was given by Professor W. T. Waugh, head of the department of History in an interview yesterday afternoon. The convention was held in London and was the third quinquennial gathering of its kind.

"Owing probably to the economic depression," stated Prof. Waugh, "the number of delegates from the United States and Canada was not as large as formerly but nevertheless several prominent men from both countries were present." Canadian representatives included Professor Waugh, Professor Duncan MacArthur of Queens, Professor Chester Newell of MacMaster, and Dr. Biggar of the Canadian Archives.

Quinquennial Meeting

The conference is a gathering of teachers and writers of history which is held every five years at the Institute of Historical Research in London. The suggestion was made at this session that the next meeting be held in America but nothing definite has been decided.

The conference was opened by Prime Minister Ramsay MacDonald of Great Britain who, said Professor Waugh, "found time in the midst of the crisis caused by the threatened collapse of Germany to deliver a most delightful address on 'The Innermost of History for the Practical Politician'."

Several general meetings of the Conference were held, one of the most interesting papers being read by Mr. Phillip Guedalla, the well known historian and biographer who spoke on "Modern Biography." A lively and witty discussion followed.

Various Sections

The conference then broke up into sections—the Middle Ages, Nineteenth Century etc., one of the most important of which was the section on Imperial and Colonial History. Professor MacArthur of Queens read an address to this section on the "Rise of Canadian Nationalism." In the subsequent debate important parts were played by Professor Waugh, Professor Newell, Professor Basil Williams, formerly of McGill and Professor Morrison, formerly of Queens.

While in England this summer Professor Waugh was working on his "History of Europe in the Fifteenth Century," which he hopes to place in the hands of the publishers in a short time. He was also working on some sections of the Cambridge Medieval History to which he has been asked to contribute.

Invite Students To Special Services

"Growing Up In Religion" Is Topic Of Sermon

All students are invited to attend a special students' service to be held at the American Presbyterian Church of the United Church of Canada, located at the corner of Dorchester and Drummond Streets, at 7.30 Sunday night. The Associate Minister, Rev. C. H. Dickinson, B.A., B.D., will preach on the subject, "Growing Up In Religion." This sermon will be especially suited to the minds of students daily having to adjust their thinking to new modes of thought and expression.

After the service the younger members of the church will be hosts to all of the visiting students at a social hour to be held in the Church Parlor. This is to be a thoroughly friendly and informal gathering with music and refreshments. This social hour is intended to give the students a chance to get acquainted with the church. This invitation is open to all who wish to take advantage of it.

Death Overtakes Arts Student

Martin O'Loughlin, former member of the class of Arts '32, died of double pneumonia on Wednesday, Sept. 30th. He was employed by the Fox Film Company and was about to commence a trip round the world for that firm when he was taken ill. The funeral will take place at 3.30 on Saturday morning from St. Patrick's Church, 460 Dorchester St., West.

Canal Commission Appoints Doctor Stephen Leacock

IT was announced recently that Dr. Stephen Leacock and two others have been named members of a new Chignecto Canal Commission. Such a canal would shorten the journey from St. John, N.B. to Montreal by 600 miles, would bring the West Indian and Ports south two days nearer Montreal and Quebec. It would shorten by 450 miles the water route by which products from Prince Edward Island and northern New Brunswick are brought to markets in eastern America.

A report will be made to the Government on all aspects of the proposal to connect the straits of Northumberland and the Bay of Fundy by an 18-mile long canal across the Isthmus of Chignecto.

Architecture Dates Back To Earliest Settlers In Quebec

Architectural Traditions Of Province Subject Of Address

DESCRIBES EDIFICES

Mr. Neilson Guest Speaker During Provincial Hour Last Night

At the invitation of the provincial government, Mr. Gordon A. Neilson, demonstrator in the School of Architecture, gave a fifteen minute talk over Station CKAC during the Provincial Hour. The subject of the address was the old Habitant buildings in the province of Quebec.

Mr. Neilson told of how French Canadian architecture had begun almost as soon as the first colonists had set foot in the new land. Indeed, so prolific were their efforts that at one time the governor of New France had to forbid the beginning of new buildings until a good quota of the old ones were finished. A count taken in the year 1666 showed that a great number of men were employed in crafts directly concerned with architecture, such as that of stone masonry.

Three Classes

These old houses, said Mr. Neilson, fall into three classes—City houses, in Quebec and Montreal, the farm houses, in the Montreal district, and the farm houses in the Quebec district. The speaker then gave a detailed description of these three types of houses. The city type, he declared, had been fairly common until quite recently, but many of them had been torn down in street widening operations and other civic alterations. These houses could have stood for centuries and their destruction was an irreparable loss.

French Canadian architecture while having its root in France, is distinctive in character and not a copy of French models. Climate and other influences produced a new type of architecture.

Valuable Guides

In conclusion, the speaker stated that an appreciation and study of these old Quebec edifices would help and guide modern architects. Not

Reginald Stewart To Give Recital

Noted Pianist Will Play At Tudor Hall

Reginald Stewart, pianist of note, and conductor of the Toronto Symphony Orchestra, will be heard in a pianoforte recital in the Tudor Hall Ogilvy's, this afternoon at 3.30. Mr. Stewart is commencing a trans-Canada concert-tour, and is at present on his way to Saint John, N.B. The duties of conductor had kept Mr. Stewart from visiting other parts of Canada. This summer he was able to visit his native country England, where he had the experience of conducting.

(Continued on Page Four)

Reporters Wanted For Sunday Night's Staff

Any students who intend joining the reporting staff of the Daily are requested to see the News Editor today between 12.30 and 1 o'clock only. A few vacancies remain for news writers, particularly on Sunday evening's staff.

Porto Rico Gives Hearty Reception To McGill Debaters

Visitors Lavishly Entertained By University And Government

ENGLISH SPOKEN

Canadians Find Own Language is Officially Used By College

The great hospitality which was shown them on their recent trip to the University of Porto Rico was the most striking impression brought back by Carl Goldenberg, Alex Edmison and Fred Stone of the McGill Debating Union. The Canadians successfully supported the resolution "Resolved that Democracy Has Failed."

"We were met by a delegation including the Chancellor of the University, members of the faculty, students and members of the Canadian Banks and industrial corporations," stated Carl Goldenberg in an interview last night.

Resume of Trip

Sailing from New York on September the 17th the debaters reached San Juan early in the morning of the 21st. They were immediately conveyed to the governor's palace where they were received by the acting-governor Hon. Jose Padin who is also commissioner of education. Thence they drove to the city of San Juan where they were entertained at breakfast by some Canadian Companies and were officially welcomed by the district inspector of the Royal Bank and by the city manager who read a proclamation declaring them guests of honour of the municipality. Goldenberg replied to this proclamation.

After this they were driven to the University at Rio Piedras where they were welcomed by a large body of students, the Chancellor, Dr. Carlos Chardon reading an official address of welcome which was replied to by all three debaters.

Dances and Lunch

The visitors were then taken for a three hour drive along an old Spanish military road from San Juan to Ponce in a caravan of six cars. A formal dance took place here at the Club de Portorico. The next morning they were tendered an official luncheon by the Mayor, the British vice-consul and the president of the Chamber of Commerce in the chamber where the city council meets. In the afternoon a tea dance was held at a dance pavilion on the shore of the Caribbean. The evening brought a further testimony to the esteem in which the debaters were held when the police were required to control the traffic at the

(Continued on Page Four)

Exchange Requires Many Extra Books

First Year Books Are Those Most In Demand

The second day of the Book Exchange while not being as successful as the opening day, showed a receipt of \$375 dollars. According to the statements of those in charge a steady income approximately that of yesterday may be expected to hold in the future. This exchange is run for the benefit of those students who wish to dispose of secondhand books. These books are sold for the students by the Book Exchange on a ten per cent commission basis.

Books will be received until the middle of next week, sales will continue until the 15th of October when the Book Exchange closes. The Exchange will reopen in February for the sale of second term books. It is open every afternoon from 2.30 to 5.30 p.m.

The Exchange has been unable to obtain a sufficient number of certain textbooks. Those in greatest demand are as follows: Chemistry (Clark), Physics (Duff), German Grammar (Van der Smitten and Fraser), German Grammar (Marthen and Erzählen), Greek Grammar (White), Physics (Duncan and Starling), Accounting (Kester), Principles of Political Economy (Gide), Latin Grammar (Marchant and Watson), Introduction to Sociology (Dawson and Gettys), Precis de la Littérature Française (M. des Granges), Graduated Course of Translation (Spiers), Morceaux Choisis (M. des Granges), History of Western Europe (Robinson), Algebra (Barnard and Child). Almost any first year book will find a quick sale as there is a shortage of these.
